agricultural experiences
and products to the
community for more
than ten years!"

Adult Farm Tours

Adults leave our farm after a tour and can honestly say they've learned a lot!

Tour the farm!

Come, visit our working farm that's been in our family for over 100 years. See what it's like to be a farmer in the 21st century. Adult and senior groups take a scenic ride on our tractor-pulled wagon and even have the opportunity to pick a pumpkin straight out of the patch! The tour also includes wildlife habitat areas in a "karst" environment as well as a private cemetery on the back of the farm.

Learn our History!

Visitors on our adult agriculture tour spend time on the century farm currently operated by Brian and Dianna Koenig, gaining an appreciation for how row-crop farming has changed over the past century. Adults learn our history and how we grow safe and healthy pumpkins, corn, soybeans, and wheat that are transformed into the foods we eat every day. Participants in the tour also learn about the challenges currently facing the agricultural industry, the agricultural economy and the use of diversification on the farm.

Lots to do!

While at the farm, adults have an opportunity to see and choose from a huge selection of specialty pumpkins and gourds in all colors, shapes and sizes. They can also play a short mini-golf game on a course made primarily out of recycled farm materials. Finally, some may enjoy taking a leisurely stroll through our small corn maze or visiting the chickens and goats.

Schedule your Trip Today!
